Declaration of our grades -California Proposition 65

Dear Sir or Madam,

we would like to make the following statement with reference to your inquiry:

As a supplier of semi-finished metal products, we are aware that according to "The Safe Drinking Water and Toxic Enforcement Act of 1986" of the US state of California (California Proposition 65), the presence of certain listed substances in products sold in the state of California leads to an obligation on the part of the manufacturer or distributor to label or warn.

We have therefore conducted a full analysis of California Proposition 65 and determined its scope as defined by law. According to this law, we do not sell a "consumer product" but a product exclusively for trade and industry. This means that we are not subject to the obligation to label our deliveries with a warning for the presence of hazardous substances.

For any further questions do not hesitate to contact me.

Best regards

Dr.-Ing. Wolfgang Püttgen
Quality Management Representative of the Zapp Group
