The history of Zapp began over 300 years ago. Today the group has around 1150 employees at six main locations in Germany and the USA and is a leading supplier of metallic semi-finished products.

The core competences of the Zapp Group include the cold forming of precision semi-finished products with a focus on stainless materials and special alloys, as well as consulting, packaging and trading in high-performance materials. Our brands and products are well established in all markets. In addition to our long experience in metals, our strengths are based on the fact that highly qualified employees work uncompromisingly in a customer-oriented manner.
